

GRAPHICS PACKAGE

The Homewood Suites Graphics Package offered by Graphics Systems, Inc. features identification signage with raised integral tactile images and Grade II Braille. Material choices include solid surface, photopolymer or photopolymer with a dimensional back plate. Colors may be chosen to coordinate with the decor of the hotel. Pool, Spa and Fitness Signage as well as Guest Room Evacuation Plans and Stairwell Identification Signage utilize other materials to complement the material selected.

DESIGN & WAYFINDING

As your site requires, Graphics Systems can design additional signage to complement the Homewood Suites Graphics Package. Custom design and wayfinding services are also available.

Because a signage system is a sizable investment, it is best to have a well thought-out plan for implementation. Therefore, in addition to providing you with an excellent product, Graphics Systems can also provide the necessary services to program a good wayfinding system.

As consultants, we can give you a clear, objective analysis of your facility's "overall" needs from the viewpoint of a visitor. Through a series of interviews and independent studies of the traffic flow patterns, we provide the most comprehensive wayfinding planning available in the industry, complete with message schedules and location plans.

INSTALLATION

We have installation teams available to integrate and install your new graphics package into your specific environment or space.

OUR COMPANY

Graphics Systems' unique combination of designers, account executives and skilled fabricators form one of the nation's few "total package" architectural signage companies. We have built our business on the added value of our complete package of services—concept to completion—followed by reliable service.
