

GRAPHICS PACKAGE

The Residence Inn Graphics Package offered by Graphics Systems, Inc. features attractive ADA compliant signage. Guest room numbers and other permanent room identification are created using a photopolymer process which produces raised integral tactile images and Grade II braille. Paint and ink colors match Pantone colors—PMS 202 Maroon copy and graphics on a field of Old Ivory. Typestyle is Optima.

DESIGN & WAYFINDING

As your site requires, Graphics Systems can design additional signage to complement the Residence Inn Graphics Package. Custom design and wayfinding services are also available.

Because a signage system is a sizable investment, it is best to have a well thought-out plan for implementation. Therefore, in addition to providing you with an excellent product, Graphics Systems can also provide the necessary services to program a good wayfinding system.

As consultants, we can give you a clear, objective analysis of your facility's "overall" needs from the viewpoint of a visitor. Through a series of interviews and independent studies of the traffic flow patterns, we provide the most comprehensive wayfinding planning available in the industry, complete with message schedules and location plans.

INSTALLATION

We have installation teams available to integrate and install your new "graphics package" into your specific environment or space.

OUR COMPANY

Graphics Systems' unique combination of designers, account executives and skilled fabricators form one of the nation's few "total package" architectural signage companies. We have built our business on the added value of our complete package of services—concept to completion—followed by reliable service.
